The history of the brewery dates back to 1784. Many 100 domestic breweries in Flanders made their own beer for their own consumption, or as a side activity of agriculture, because it was safer to drink beer than water. In Ertvelde, began Jean Baptise De Bruin Brewery DE PEER. He began brewing beer as their main activity. Today is chaired brewery of Paul Van Steen Berge and Jef Versele, son of Greta Van Steen Berge - son of Paul's sister. The future is guaranteed thanks to the sixth generation.
